COMMERCIAL OFFER

BRYANSK ELECTROTECHNICAL PLANT

Bryansk Electrotechnical Plant is located in the industrialized city of Bryansk, which is also the largest transport hub, which makes easier the delivery of the plant's products by rail and road both throughout Russia and abroad.

BRYANSK ELECTROTECHNICAL PLANT

Bryansk ETP LLC focuses on production and supply of electrical equipment for electric networks of 0.4-35kV voltage rating. The product line represents a state-of-the art equipment designed to improve the reliability of power supply, fiscal metering of electricity and improve its quality. The experience gained and the competence allow us finding an individual solution for the customer at all times. Our company is certified according to the international quality management system which is confirmed by ISO 9001 certificate.

Bryansk Electrotechnical Plant has well-equipped production facilities, sophisticated technologies and well qualified personnel including its own design bureau, which allows us to fulfill contractual liabilities with high quality and in a timely manner. After assembly, all products undergo user acceptance tests (UAT). The Company's experts monitor the success of tests during high-voltage tests for operability and compliance of secondary connection schemes. Only after successful UAT completion, the product is considered ready for delivery, is provided with accompanying documents and is packed for transportation to the customer. Factory warranty is provided for all manufactured equipment.

OUR PRODUCTS

BRYANSK ELECTROTECHNICAL PLANT

- Recloser: 6(10) kV.
- DMP/TEL overhead line metering and sectionalizing unit: 6(10) kV.
- Retrofite of switchgear cubicles - draw-out elements to switchgear cubicles, series: K-XII, K-XXVI, KPY-2-10, K-IIIY, K-VIY, VH111(HL 4/7), K-47, K-104, etc.
- Cubicle switchgears, series: R-40, R-12, KM-1, K-12, KCO-298.
